#### Markant Data for Dacos Software

*Saarbrücken* Thanks to a newly agreed upon cooperation between Dacos and Markant, trade-related data can flow into the price optimization software from Dacos. This enables even external retailers to access the promotional prices of the German trade market, which are stored in the Markant database 'Mapis'. The trade cooperation evaluates daily newspapers and flyers from the top 50 domestic retail businesses for Mapis. In addition, Markant members can have the shelf price data recorded in Mapis further processed from Dacos. Users of the first hour for the price and promotion optimization software include the Schlecker sales channels Ihr Platz and Tegut.
